### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bish et al (US Patent Number 5235585).

Bish et al discloses an information recording/reproducing apparatus that performs reading and writing of information with respect to an information recording medium in which user data areas and alternative areas are alternately arranged (Fig. 5, at the end of each group is a spare area), said apparatus comprising: a device for reading and writing the information; and means for performing a certify process and verify process with respect to the user data areas and the alternative areas in a

predetermined sequence (Column 6, lines 13-24), when an error occurs during the certify process or the verify process performed with respect to one of the user data areas (secondary defect), such that an alternative destination is selected from an adjacent alternative area corresponding to the user data area when an unused field exists in the adjacent alternative area (Fig. 6A, Step 33, yes A2), and such that the alternative destination is selected from another alternative area on which the certify process and the verify process have already been performed according to the predetermined sequence in the case where an unused field does not exist in the adjacent alternative area (Fig. 6A, Step 33 if spare is not found go to Steps 35 and 36 to find the next spare area in the next nearest group), wherein each user data area is preceded by a corresponding adjacent alternative area (Fig. 5, Groups 0-6 at the end of each group a spare area).
